TECHNICAL SKILLS

- **Programming & Scripting Languages**

JavaScript (Node.js), Typescript, Java, PHP

- **Backend Development**

Node.js, Express, RESTful API development, authentication systems (JWT, RBAC).

- **Frontend Development**

React, Vite, TailwindCSS, Zustand, Framer Motion

MongoDB, MySQL

- **Testing**

Insomnia, Light house

EXPERIENCES

- **Frontend and Backend Developer Intern**

Wayne Enterprise Solution Corporation

Feb 2026 – May 2026

- Developed and maintained frontend and backend functionalities for the GIS General Inventory with POS System using modern web technologies, improving inventory monitoring and transaction processing efficiency.
- Designed responsive user interfaces and implemented system features for inventory management, product tracking, sales transactions, and reporting across desktop and mobile platforms.
- Integrated backend logic, database operations, and real-time data handling to streamline business workflows, reduce manual inventory errors, and improve operational accuracy.

SYSTEMS & PROJECTS

- **General Inventory with POS System (GIS)**

Wayne Enterprise Solution – Frontend & Backend Developer

- Developed a web-based General Inventory with POS System to streamline inventory monitoring, sales transactions, and product management processes.
- Implemented inventory tracking, stock management, and sales reporting features to improve operational efficiency and reduce manual record-keeping.
- Enhanced workflow accuracy by centralizing inventory and sales data, improving business monitoring and reducing inventory discrepancies.

- **EfeeSync – CBSUA Fee management**

Central Bicol State University of Agriculture Sipocot (CBSUA) – Frontend Developer

- Developed responsive and user-friendly frontend interfaces for the EfeeSync Fee Management System to improve accessibility and usability for students and administrators
- Implemented interactive UI components and integrated frontend functionalities for fee monitoring, payment tracking, and transaction management.
- Enhanced user experience and workflow efficiency by organizing financial information into a centralized and easy-to-navigate platform.

- **CIT Capstone Repository**

Central Bicol State University of Agriculture (CBSUA) – Lead Frontend Developer

- Led the frontend development of the CIT Capstone Repository system, creating responsive and user-friendly interfaces for managing and accessing capstone projects.
- Designed and implemented interactive UI components, search functionalities, and project viewing features to improve user navigation and accessibility.
- Improved overall user experience by organizing capstone records into a centralized digital repository, making project submission and access more efficient.

EDUCATION

- **Bachelor of Science in Information Technology (BSIT)**

Central Bicol State University of Agriculture, Sipocot, Camarines Sur, Philippine
